DEADLINE FOR THE MARCH-APRIL ISSUE
IS FEBRUARY 15, 1987

FROM THE EDITOR

A new year is upon us. It looks like its going to be the best yet. There are Tandem Events scheduled all over North America for 1987, including South Central Florida (near Cyprus Gardens), Eugene, OR, Toronto, CANADA, Grand Rapids, Michigan, New Jersey (near Princeton?), and Texas. If you can't find a tandems only event near you, then consider hosting one yourself. It's fun, and it'll bring tandemists out of the woodwork, too!

As you'll note, this is our annual membership issue. Take a moment and just scan through the list. See who's there and who's not there. Anyone who had sent their dues to Mal & Jean Smith by December 10th should be listed. If there is something wrong with your address, or how your name is spelled, send your address corrections directly to Susan & me, your Editors, as this list was printed directly from the database used to print your label.

Most important, though, look how long the list is this year. It's 473 names long! That's an increase of 112 names since last January, a 31% increase in just one year!! What do we owe this large and rapid growth too? To you, the Tandem Club of America members. It is you who've spread the word to others around you. It is people like the folks at Santana Cycles, Inc, who include a membership brochure with every new tandem they sell. It is rally chairmen, who include a brochure or a DoubleTalk with the membership materials. And it is each of you who have taken the time to write an

article for DoubleTalk! We thank you all!

Mal and Jean Smith, our treasurers, have relocated to East Aurora, New York. The masthead on page one, the membership application on the back page, and on the brochure in the center of this issue have all been changed to reflect their new address, but you might want to make the correction in your address books.

The Eastern Tandem Rally, TANDEM'86, donated \$523.00 to the Tandem Club. TANDEM'86's chairman, Charles Dye, has asked us to consider using some of these funds to incorporate TCA. Should we? The idea is not new, but to date we haven't pursued incorporation for the TCA. What do you think the TCA should do? List your thoughts, and what you feel are the pros and cons of the idea, and send them to DoubleTalk. Your thoughts will go far in determining the future directions of the TCA.

Don't have any New Year's Resolutions, yet? Consider these for 1987:

1. Get one new tandem team to join TCA.
2. Renew my membership promptly, maybe even for two years.
3. Write at least one article for DoubleTalk.
4. Attend at least one Tandem Rally!

We're looking forward to good times in '87. See you on the road!!

LETTERS

TO DOUBLETALK

Dear DoubleTalk:

We noticed in our last issue of DoubleTalk that the MA/CT/RI area is in need of an area rep. We have been active cyclists in the Western MA/Northern CT area for several years. We've just completed our second year of tandemming, and we are looking forward to our third year. We love it, and would be interested in sharing our enthusiasm with other tandem pairs in Southern New England. Can you make use of our wishes?

Pete & Tracy Carne
21 Klaus Anderson Road
Southwick, MA 01077

Dear Peter & Tracy:

Welcome to our volunteer ranks! I hope you find it easy and rewarding, spreading the word about Tandems and the Tandem Club of America! As you find out about Tandem events in your region, please keep us informed, so we can keep the calendar up-to-date!

Editors' Note: We had two vacancies listed in the area reps' ranks in the November-December issue of DoubleTalk! In less than two weeks, we had five applications for these two positions. We took the democratic approach, and selected the first volunteer for each position. We welcome all new volunteers to the Area Reps positions. Take a minute and look at page one and see who your area rep is. Then keep them informed of what's happening in the region. They (and we) will appreciate it!

Dear DoubleTalk:

I look forward to reading my first copy of your newsletter, as I've never seen one. I found out about the TCA from a flyer enclosed with one of the Santanas we received at the shop where I work. I was hoping that, if possible, you could forward a few flyers for handing out to tandem enthusiasts and customers in this area.

Walter E. Liecker
2233 Emerald St.
San Diego, CA 92109

Dear Walter:

There are two membership brochures included in the center of this issue. Please feel free to duplicate them and pass them out to every tandem team you see. And thanks!

Introducing the Tandem Club of America

Perhaps you have heard of us. Maybe you were even a member in the past. But if you are not a member now, you may not know what today's Tandem Club is all about.

The Tandem Club of America (TCA) was founded in 1976 by a group of tandem enthusiasts who wished to share their enthusiasm with the uninitiated, and to exchange bits of information among tandem owners throughout the country. (Back then, there weren't all that many tandems out there!) These original members created a newsletter, called DoubleTalk, as the voice of TCA. Today, DoubleTalk is one of the most visible signs of the Tandem Club of America. It is published six issues a year in a magazine format. It contains articles about tandems and tandem touring which have been written by the members. You can also find out about what is happening in the world of tandems through the Tandem Calendar. A classified section is included, too, to help sell that extra set of wheels or that tandem that doesn't fit this year's color scheme!

Over the years, the TCA has been instrumental in promoting rallies for owners of long bikes. From the original rally held in 1972, there are now three regional rallies and one state rally to choose from. All, while independent of the TCA, are heavily promoted and supported by TCA members. You can find out the when and where through the DoubleTalk!

If you want to join with other tandem enthusiasts across the country, just fill out the attached membership application blank, and you will soon be receiving copies of DoubleTalk in your mailbox!

Hope to see you on the road!

Please fill out the application below and mail with check for \$8.00US (\$10.00US for foreign memberships) payable to

THE TANDEM TOOLBOX

Teaching the old CatEye New Tricks

The popularity of electronic bicycle computers for speed, distance, and time, in particular the CatEye Solar model, have left tandem riders with some interesting mounting problems to overcome. The mounting tricks I'll be discussing here will work for either the CatEye Solar or the CatEye Mate (the Mate model does not offer cadence readings).

For mounting a single unit on the front bars, there are a couple of simple tips to use. On forks with a larger cross-section (yes, the ones like those on certain California-made tandems) use the clamp off the cadence sensor with one of the thick rubber pieces to wrap around the fork for the speed pick-up. The fork clamp for single bikes will not fit with the rubber piece.

Now for the cadence, go down to your nearest Schwinn shop and ask for a 1-1/8" seat tube cable guide for a 3-speed, the old kind with the pulley for the cable. Remove the pulley and use the pulley center bolt to attach the cadence sensor to the clamp. ; You are now ready to mount this assembly on the seat tube with the sensor on the timing ring (connecting chain). Mounting in this method will protect the sensor from being knocked out of alignment.

If you wish to use the computer on the rear only, you will need a rear wheel kit (these are used for rear wheel fan trainers on singles). You will still run the speed off the front wheel. Mounting the speed pickup on the rear of a tandem presents a number of special problems because of drum brakes and the extra dis-

tance between the chain stays and the spokes. You also want to keep the magnet within 6" of the axle to insure accurate readings.

Front and rear computers are convenient to have, especially if you are (or have) a backseat navigator like Linda. Keep in mind that the more advanced units can be reprogrammed for wheel size to allow switching the computers you have from one bike to the next.

There are two ways going about a dual mounting. The low tech (or easy way) is to use two complete mounting units, using the standard for the front and the extra long "rear wheel" kit to run from the front wheel to the rear handlebars. Put a ring on each side of the front wheel and run a cable up each fork blade.

If you are a high-tech perfectionist, you can assemble a dual CatEye mount, combining both the front and the rear wheel mounts into a single unit. The full steps are beyond the space allowed here, but if you are a hobbyist with some experience with soldering (use a 15-watt "pencil"-type iron), here are a few tips:

Make the "splice" inside the front display unit. Use a parallel circuit with the posts coming through the mount as the

splice point. You will need to remove the resin covering the factory connections, and this is best done with either a Dremel power tool or by carefully drilling a dozen or so very small holes into the resin only. The remaining resin can be chipped away with a knife or a small awl.

After soldering, test the mount with a computer and a magnet, and then use a silicone or liquid rubber compound to reseal the connections. And keep in mind the fact that the circuit will not work until the sealant is completely dry. Allow at least 24 hours.

If you are careful when cutting the front wire, you will have enough slack for a 23" or smaller head tube. On 24" or larger bikes, you may wish to use 2 rear wheel units to insure you have enough wire. When laying out your front-to-back distance, keep in mind whether you ever intend to use a child conversion stem or

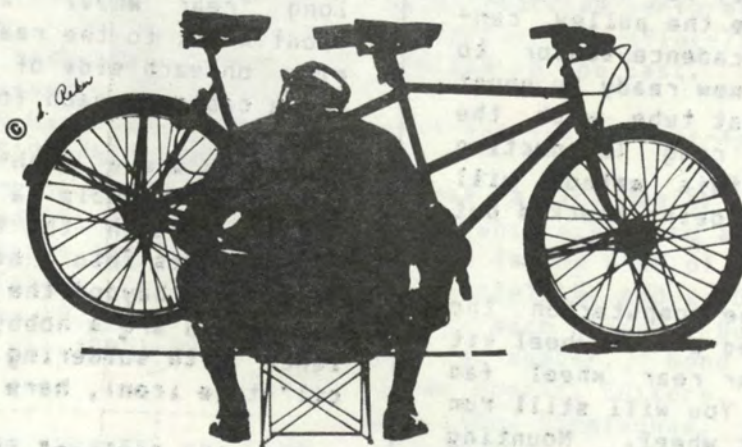

if you have an adjustable rear stem.

I have yet to try splicing the mounts for other makes of cyclo computers, but I would like to hear from anyone who has successfully made such a modification.

Cyclo computers can add a fun dimension to your cycling, and they are very helpful for training. You will also find the accuracy of these units helpful while on a tour for following maps and planning your days. Of course, you may not want to know that your club's "Century" is really 114 miles long!
