DEADLINE FOR THE MARCH-APRIL ISSUE IS FEBRUARY 10, 1988!

FROM THE EDITOR

It's hard to believe it, but Susan and I are starting our fourth year as your DoubleTalk Editors. What's most amazing to us is the fact that it's still a lot of fun to do. Sure, it's work, but the pleasure of reading your submissions far outweighs any negatives that may accompany this job. You, the members of this fine organization, are what keep it that way, too. Our list of contributors is steady, and we really do appreciate the work that goes into the art you submit, the articles we receive, and the letters to DoubleTalk. This is a user-run volunteer organization, and it only works as well as you make it.

In the next issue we'll be publishing the results of the TCA survey. I received the summary from our Secretary, Laura Mappin (drop her a line and thank her--she's been a very busy lady in the last year), just before we began work on this issue. Of course, as this is the membership directory, we didn't have room to run it this time.

Speaking of our membership--WOW! The list now numbers nearly 700 names. A year ago the list contained less than 500. That works out to an annual growth rate of about 40% per year! As of January 1, we have members in 42 states, the District of Columbia, 4 provinces, the United Kingdom, and Israel. We also have several APO/FPO addresses, too. We truly are an International Organization! Wouldn't it be great if we could add 40% more members in '88, with members in all 50 states, all 10 provinces, and even more countries?

We've received several suggestions for T-shirt designs. We'll be accepting new designs through the end of February, then we'll be mailing copies of all the designs

received to the area reps for their comments and suggestions in March. If you haven't started a design, but are considering one, we'd like everyone to remember that we are an international club. Also, please send your artwork to us by March 1. We'd hate to receive the perfect design on March 8, after the deadline.

See you at a Rally!

I THOUGHT THAT WHEEL WAS LOOSE.

WHO DOES WHAT

AREA REPS: Local tandem information & local recruiters for TCA.

GRAPHICS DESIGNER: Artwork & graphics for DoubleTalk.

TREASURER: DUES and patches.

SECRETARY: Contact point between TCA and the outside world.

EDITOR: Edits your articles for DoubleTalk, Advertising, and membership data (including mid-year address corrections).

TIPS FOR TOURING WITH A TRAILER

As you tandem tourers know, it is very difficult to pack for two when touring/camping with a tandem. Not only do you have a problem with "Where do I put everything?" you also are faced with increased spoke breakage, tire wear, etcetera. And if that isn't bad enough, the bike's handling can be severely affected, too!! We found, when we loaded everything on our tandem, the the handling was sometimes dangerously altered for low-speed maneuvering, and almost always it felt out of control during high speed descents on curving mountain roads.

Our tandem is a 14-year-old Gitane, with many, many thousands of miles. It has

been repainted twice, and through the years we have replaced every original steel component with alloy. It is now a 15-speed, with gearing from 29-inch low to 104-inch high. We use it for "just riding" (although we both have singles, too), but mainly we use it for touring. When we tour, it is usually for two weeks, and we choose to camp out most nights. We carry quite a bit of gear!

For the past six years we have used the Cannondale Bugger trailer for our bulky items, like clothing, our tent, sleeping bags, and our ground pads. Smaller items are put in the handlebar bag, or in a set of very small panniers. This leaves the bike very lightly loaded, and it retains its good handling characteristics. Except for the third "clunk" when going over the expansion joints in the pavement, we never

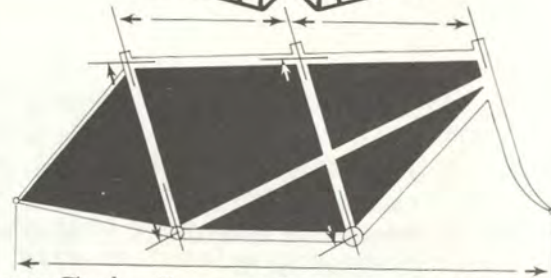

know the trailer is there. The only real disadvantage is the increase in overall weight when hill climbing. Even when we're screaming down the hills at 50+ miles per hour, the bike handles as if there were no load at all. The trailer does not bounce or swing from side to side. Although the Bugger is designed to take loads up to 80 pounds, we do try to keep our loads to under 40 pounds.

The nylon cover available as an option on the Bugger is a must when hauling gear as it not only keeps items from falling or blowing out, it keeps them from getting dusty and keeps the contents dry in rainy weather. The cover has an elastic band around the outside edge to hold it on, but we quickly discovered that it comes off much too easily. Four small spring binder clips, like you use in your office to hold papers together, keeps it quite secure, even when big trucks roar by. The clips can be found in any office supply store.

One final caution: If you want to be inconspicuous, riding a tandem and pulling a trailer doesn't do it! We have had automobile drivers actually drive off the road, trying to see what strange vehicle just went past!. We receive endless questions about the rig. Kids love it, dogs don't understand it, cats are scared of it. Endless streams of cars, bikes, and walkers often parade past our campsite in the evening as word spreads through the small towns that there is a strange contraption at the local campground. Sometimes you feel like having a pre-printed explanation ready to hand out, with questions like "Did you make it yourself?" and "Is there a motor in there?" already answered.

THE TANDEM TOOLBOX

I talked about the Arai Brake in my last column and one of a few years back, but I've never come up with a satisfactory way of removing the drum from the hub for spoke repair and wheel rebuilding. But with the helpful suggestions of another tandemist, I have found a simple and inexpensive tool for the removal of the Arai brake drum from the hub. This is a home-made tool can be assembled in 10 minutes with an electric drill and less than \$5.00 in materials.

The parts list for your own Arai Drum remover consists of:

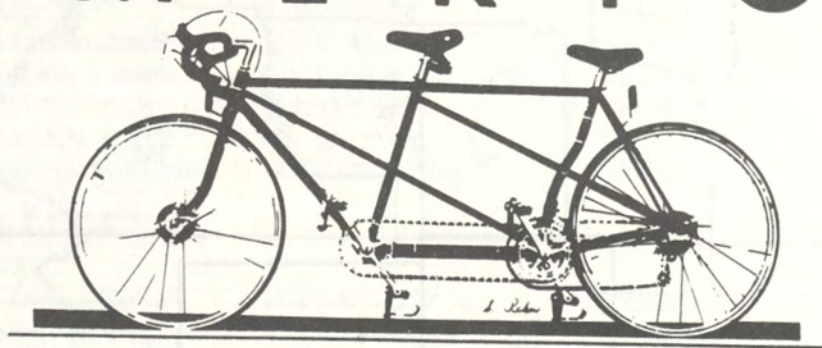

- * 1 4' long piece of "2x4" lumber
- * 2 3/8"x 3" carriage bolts, w/nuts
- * 4 3/8" steel flat washers

For tools, you will need an electric drill with a 3/8" diameter drill bit or wood bit, a square and a ruler. You may also want a crescent wrench to tighten the nuts and bolts. Of course use safety glasses and follow the appropriate safety rules.

TANDEM CLUB OF A · M · E · R · I · C · A

"An International Organization for Tandem Enthusiasts"

Introducing the Tandem Club of America...

Perhaps you have heard of us. Maybe you were even a member in the past. But if you are not a member now, you may not know what today's Tandem Club is all about!

The Tandem Club of America (TCA) was founded in 1976 by a group of tandem enthusiasts who wished to share their enthusiasm with the uninitiated and to exchange bits of information with other tandem owners throughout the country. (Back then there weren't all that many tandems out there!). These original members created a newsletter, called DoubleTalk, to be the voice of the TCA. Since those beginnings, DoubleTalk has become one of the most visible signs of the Tandem Club of America. DoubleTalk is published six times a year in a magazine format. It contains articles and tips about tandems and tandem touring, all written by TCA members. You can also find out what is happening in the world of tandems through TCA's Tandem Events Calendar, published each issue in DoubleTalk. A Classified Ad section is included, too, to help sell that extra set of wheels or that tandem that doesn't fit this year's color scheme!

Through the years, the TCA has been instrumental in promoting rallies for owners of long bikes. From the original rally held in 1972, there are now four regional rallies and many state and local events to choose from. All, while independent of the TCA, are heavily promoted and supported by TCA members. You can find out the when and where through DoubleTalk!

If you want to join with other tandem enthusiasts across the country, just fill out the attached membership application blank, and you soon be receiving your own copy of DoubleTalk in your mailbox!

Hope to see you on the road!

Please fill out the application below and mail with a check for \$8.00 US

(\$10.00 US for foreign memberships) payable to Tandem Club of America. Send it to
Mal and Jean Smith, TCA Treasurers

"An International Organization for Tandem Enthusiasts"

Introducing the Tandem Club of America...

Perhaps you have heard of us. Maybe you were even a member in the past. But if you are not a member now, you may not know what today's Tandem Club is all about!

The Tandem Club of America (TCA) was founded in 1976 by a group of tandem enthusiasts who wished to share their enthusiasm with the uninitiated and to exchange bits of information with other tandem owners throughout the country. (Back then there weren't all that many tandems out there!). These original members created a newsletter, called DoubleTalk, to be the voice of the TCA. Since those beginnings, DoubleTalk has become one of the most visible signs of the Tandem Club of America. DoubleTalk is published six times a year in a magazine format. It contains articles and tips about tandems and tandem touring, all written by TCA members. You can also find out what is happening in the world of tandems through TCA's Tandem Events Calendar, published each issue in DoubleTalk. A Classified Ad section is included, too, to help sell that extra set of wheels or that tandem that doesn't fit this year's color scheme!

Through the years, the TCA has been instrumental in promoting rallies for owners of long bikes. From the original rally held in 1972, there are now four regional rallies and many state and local events to choose from. All, while independent of the TCA, are heavily promoted and supported by TCA members. You can find out the when and where through DoubleTalk!

If you want to join with other tandem enthusiasts across the country, just fill out the attached membership application blank, and you soon be receiving your own copy of DoubleTalk in your mailbox!

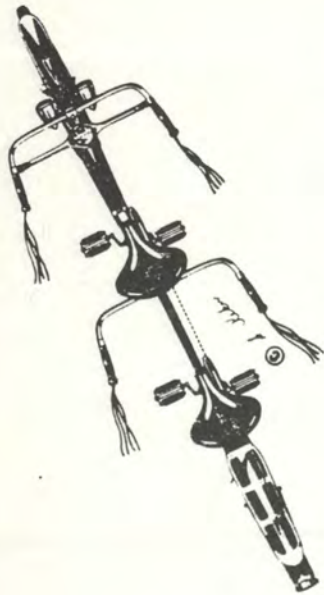

Hope to see you on the road!

Please fill out the application below and mail with a check for \$8.00 US payable to Tandem Club of America. Send it to
Mal and Jean Smith, TCA Treasurers
11010 Jamison Road
East Aurora, NY 14052

The assembly of the drum remover requires drilling 3 holes with your 3/8" drill through the thin section the 2x4. (If your tandem uses a Phil Wood Hub, your will need the center hole to be 3/4" in diameter.) The holes should be on a center line of the "4" side and on 2 and 3/4" centers, starting 3" from the end of the 2 x 4. Once you have finished the holes, push the carriage bolts through the first and third holes, with washers on either side and then tighten the nuts snugly. Your drum remover is now complete.

Before you can use your new drum remover, the rear wheel should be removed from the tandem and the brake actuator plate removed the axle. (see the March April DOUBLETALK) Then find a wall which you don't mind marring with a tire and stand with your right side against the wall, with the freewheel side of the wheel toward you (the freewheel should be between your knees) and the brake-side opposite you.

With the drum remover to your left, slip the center hole of the remover over the rear axle. You can then insert the extra length of the carriage bolts into the existing holes in the flanges of the brake drum. Now carefully push or pull the remover toward the wall, checking to be sure the bolts don't extend into the spokes. (The drum removes counter-clockwise.) You will roll the wheel against the wall until the drum loosens and you can turn it by hand.

For re-installing the drum, use the same precautions you should when installing a freewheel. First wipe clean the threads of the drum and hub, and then apply a thin layer of grease to both sets of threads. Line up the drum and hub squarely and slowly turn the drum clockwise. If the drum is not square with the hub or does not turn easily, start over again to be sure they are not cross-threaded. The drum requires hand tightening only. You can now reinstall the actuator plate on

the hub. Once the wheel is back on your tandem, the drum will tighten when you apply the brake during your test ride.

Speaking of the after service ride, any time you service any bike, you should check your work carefully before the next ride. Check the tightness of brake cables by squeezing the levers hard, check the quick releases and axle bolts, straddle the front wheel and try to twist handlebars left to right and up and down; and try twisting the seat left to right. This little test can save a lot of grief and isn't a bad idea before test riding a new bicycle at a bike shop.

If you have the luxury of sturdy workbench, you can make a bench-mounted remover by substituting a 12" piece of lumber for the 4' piece. Once the carriage bolts are in place, firmly bolt or nail the remover to an out of the way place on the bench (check to see if you have room for the wheel) and use the wheel for turning the drum off.

Also keep in mind that the brake drum (and freewheel) should be removed from the hub before the spokes and rims are removed. Without the leverage of the rim and spokes, it may be impossible to remove the drum and freewheel without damaging the hub.

Many thanks to Jack Goertz for the original idea. I am also working on "touring" model, and I'll let you know how it comes out.

Until next time, Good Cycling!

TANDEM TOURING BY CAR?????

Legend says that a tiny town in Oregon received its name from the Indian custom of sharing a horse. Having only one horse between them, two tribesmen on a journey would share, riding and walking. One of them would ride ahead of the other, leave the animal at a predetermined place, and proceed on his journey on foot. Upon arriving at the horse, the other Indian would mount, catch and pass his fellow traveler, and repeat the procedure. Following this procedure all day produced more miles than would have otherwise been possible for two travelers and one horse. The town in the legend? Noti, Oregon. The story is that an Indian and a white man traveled in this manner until the Indian arrived at the appointed place, the site of present-day Noti. Not finding the horse, the Indian said "White man noti".

We have applied this old Indian custom to our tandem travels with pleasing success. One couple drives ahead, carrying their bike on the car. They leave the car at some predetermined place some distance ahead, the proceed on their tandem. The other couple follows by bike, pedalling to the car, loads, and drives on to the next

stop. By alternating driving and biking, we are able to support the tour with a car and its goodies (ice chest, coffee, dry clothes, etcetera) during the day. At night it's there with its load of camping gear or city-type clothes should we choose to hit the bright lights. Shared driving has kept that chore to a minimum for everyone.

Another advantage of our system is the "ability equalizing" effect of the car. It permits teams of different skills, physical stamina, interests, and priorities to travel together, each able to fulfill their unique goals with no difficulty or discord. The young, fast, "eat up the road" types may ride twice as far or twice as fast as the "stop and smell the roses" team, yet both will be in camp or motel about the same time, and equally satiated or satisfied with the day's ride. The car's space allows nearly unlimited transport of gear and equipment. Thus extra bike tires, tubes, wheels, parts in general, along with ice, fresh fruit, and bulky foam mattresses can be included, things typically sacrificed on a tandem tour because of the bike's limited carrying capacity. At days' end, the car gives long distance mobility in the search for supper or campsite and it protects the tourists from the heavy afternoon traffic in urban areas. Neither couple has had to compromise their tour goals of speed, miles, or sight seeing, in order to conform to the needs or ability of the other.

Enthusiasm, resolution, and determination, the areas vital to the success of self-propelled journey, are directly related to scenic, historic, or esthetic values, and dedication to them quickly lags when confronted with tedium and monotony. All touring routes offer some very dull, often boring and undesirable sections. These, with both teams in the car, we are able to quickly pass, saving our time and energy for the interesting, scenic, and picturesque areas.

Carrying two tandems on the car has worked well for us. I designed a bike carrier which permits easy on/off with no equipment removal. Loading time is a matter of 3 or 4 minutes, and a team loses very little time in the exchange. Tandem carriers are easy to design and build, although custom fitting is necessary since all cars present different problems. The new cars with cardboard or plastic bumpers might even be described as challenges, since they present difficult but not unsolvable problems.

We have experienced no trouble in leaving the car unattended, although we do seek whatever protection is available, such as a business, farm, or house. Often, however, there is none. In that case we leave it in the most exposed position possible, feeling full visibility is the best protection. We do not expect that it

will be left long enough (2 or 3 hours at most) to generate much interest. In our area, abandoned cars don't seem to be abused for the first 24 hours or so.

By using this "old Indian custom" we have been able to extend our touring range, seeing much more interesting scenery, and vastly improving our touring comfort level. The extra clothes, gear, equipment, and spare parts have improved our "on the road" lifestyle and have eased many of the undesirable aspects of tandem touring. We find ourselves touring more and enjoying it more!
